

The Listening Project

Jane R. Madell, PhD

Irene Taylor Brodsky

The Listening Project

- The *Listening Project* explores the profound impact of technology on the lives and identities of young deaf adults. Intimate and direct, fourteen people tell stories beginning with a childhood wide-eyed about sound, into the growing pains of adolescence and, eventually, the challenges of their professional lives and of parenting their own children. Sometimes humorous, always tender, *The Listening Project* is a coming of age story for our modern times.
